OPERATION
RIVCO SHIELD

1

Lower Risk Young and Healthy

If you test positive for COVID-19, over the counter treatments for symptoms may include:

- Nasal sprays
- Cough/throat drops
- Decongestants
- Pain and fever medication (e.g., Tylenol, Advil)

2

Higher Risk Older and/or with Underlying Health Conditions

If you test positive for COVID-19, you may be eligible for:

- Oral antiviral treatment [within 5 days] ***prescription needed***
- Monoclonal antibody treatment [within 10 days]
- Remdesivir [within 7 days]

3

Highest Risk Immunocompromised

If you do not currently have COVID-19, but you have a weakened immune system due to conditions such as cancer, an organ transplant, or you are on medications that bring down your immune system, you may be eligible for:

- Evusheld Monoclonal Antibody treatment

If you test positive for COVID-19, you may be eligible for:

- Oral antiviral treatment [within 5 days] ***prescription needed***
- Monoclonal antibody treatment [within 10 days]
- Remdesivir [within 7 days]
